## PIPING

... stainless steel from standard to special.

To guarantee a constantly high level of quality and availability as well as price advantages, our broad and deep stock range is continuously adapted to suit the current market situation - naturally approved and certified.

## PROVISION

... from small elbows to major projects.

Maximum flexibility! Fast and uncomplicated fulfillment of demands ensures efficiency and time savings. In addition to customised packaging and marking, we offer fast, reliable and uncomplicated support - also beyond our in-house range.

## PASSION

... creating value through active partnerships.

Commitment, a personal touch, an open ear, all-round consultations and development to meet all demands with an approach that is fully geared to solutions as well as courage to set out on new paths to follow new visions.

## WITTE

... one team - one goal.

The flat hierarchy of a family-run company permits dialogue with the entire team. Cooperation on a basis of honesty and respect enables us to enjoy mastering daily challenges with assertiveness and guarantees an outstanding performance to ensure the financial success of our customers and business partners.

**WITTE** More flexibility by cutting machining center.  
Special solutions beyond the range of solutions are rapidly produced in-house to the customers specifications.

## WITTE - MACHINE SHOP

We have set up a machine shop to optimise our customer service. We constantly extend our range of equipment to keep pace with the requirements and wishes of the market, motivate our workforce and are naturally certified to PED and AD-2000 WO.

In addition to machining welding fittings and flanges, we can also produce parts from bar material.

**We manufacture small series and individual components with a dimensional accuracy of ≤ 0,1 mm.**

All commercially required approval test certificates in compliance with **EN 10204** with certification to **DIN/EN** and/or **Vd TÜV** material sheets or corresponding **ASME** and **NACE** are included in our standard scope of supply. We can also carry out short-term additional tests in accordance with individual order specifications and provide the necessary certification. Other specific structural designs and dimensions can be ordered and supplied at short notice, partly from our own machine shop.
